EXPLANATION: None

PROJECT COST: None

SOURCE OF FUNDS: None

SPONSOR: The Board of Regents Committee on Honorary Degrees and Awards

RECOMMENDED: James B. Milliken
President

DATE: February 7, 2014

rentable square feet (comprised of 36,000 gsf of office/laboratory space and 53,650 gsf of greenhouse space) in the Life Sciences Collaboration Center (a complex that combined the former Industrial Arts shell with a new building) on Nebraska Innovation Campus (NIC). These leased spaces included wet and dry lab facilities, greenhouse space, head house and high bay facilities as well as office space in the Innovations Commons and Life Sciences Collaboration Center.

Planning for NIC facilities continues to evolve. To achieve savings in construction costs, greenhouses that were originally planned to be erected on the 2nd floor of the former Industrial Arts Building will now be moved to the east of the Life Sciences Collaboration Center. In lieu of second floor greenhouses in the former Industrial Arts Building, offices will be constructed.

Programmatic strategy also continues to evolve. UNL will now move its Department of Food Science and Technology (FDST) to NIC and locate its labs adjacent to the planned greenhouses.

With this change, the combined former Industrial Arts and adjacent new building, earlier identified as the Life Sciences Collaboration Center, will become the Food Innovation Center. The Food Innovation Center aligns with the University's strategic pillars of Food, Fuel and Water. It enables the development of world-class facilities in conjunction with private partners. It also makes UNL an immediate national player in vying for a national "Innovation Institute" in food engineering as recently proposed by the President's Council of Advisors on Science and Technology.

With these changes, the total space required for FDST is 123,000 GSF of building space and 22,475 GSF for ARD Plant Sciences within the Greenhouse complex. Total square footage under lease will increase under the proposed leases by approximately 117,000.

Total proposed space under lease is as follows:

In consideration for the University assuming a lease on 100% of SDL II pursuant to this lease agreement, Nebraska Nova agrees to (1) immediately proceed with design and programming for 80,000 GSF at NIC for future tenants; will undertake good faith efforts to obtaining leasing commitments acceptable to CDC; and will begin construction of the same within a reasonable time not to exceed 18 months after occupancy of the Life Sciences Collaboration Center/Food Innovation Center.

The changes in the leases have been reviewed and approved by the Business Affairs Committee.

Approval of this item also authorizes the Chancellor of the University of Nebraska-Lincoln, in consultation with the President and General Counsel, to approve, execute, and administratively process the leases contemplated above, provided they are materially consistent with the foregoing terms.

PROJECT COST:	None	
ON-GOING FISCAL IMPACT:	Former Lease Commitments	\$3,280,000
	Additional Leases	<u>4,520,000</u>
	Total Lease Commitments	<u>\$7,800,000</u>
SOURCE OF FUNDS:	Cash Funds	
SPONSORS:	Harvey S. Perlman Chancellor	
	Christine A. Jackson Vice Chancellor for Business and Finance	
	Joel D. Pedersen Vice President and General Counsel	
RECOMMENDED:	James B. Milliken, President University of Nebraska	
DATE:	February 20, 2014
